Krister Kittelson (<https://autocare.communifire.com/people/krister-kittelson>)

12/4/2020

Hello, All,

Pretty sure this one is the one that will go out for the 0.9.0 release. Have a look and let me know what you think.

Notable changes:

- I removed the interaction diagram from the Alpha, as this is still in process and in flux. I want to get this prepped for release to get the plan documentation out.
- Corrected, in the basic terms section, inappropriate use of word "Transaction" to describe a Sandpiper interaction. This is a specific action within the synchronization step, not a general catch-all as I had it before.
- Added "Sandpiper Native" type of Sandpiper implementation

When we're ready to release I need to figure out the webpage update, haven't done that in too long. I'd also like to get a specific Artistic License statement at the front of this so it's clear that this document is covered by the Artistic 2.0 license like the source code (I consider this communication as my own license of this documentation to you all under the same terms, in case there's ever any ambiguity until that point).
