Krister Kittelson (<https://autocare.communifire.com/people/krister-kittelson>)

11/20/2020

Hello, All,

I've finished a revised version of the documentation, taking into account the discussions we've had around the plan UUID and the new connection model. I made some assumptions about the order of communication that need reviewing.

Pieces that still need to be documented for 0.9.0 beta are the underlying connection and authentication methods.

For 1.0 we'll also need to get the documentation of the API methods together and make sure they function. This will be a bit piece to handle so it'll take some time ahead of our February target! I'll need help from everyone who has knowledge of it for that goal, but I think 0.9 is almost ready to publish more widely.
